

TAMPA BAY WEEKLY INTELLIGENCE REPORT
& EXECUTIVE TRAVEL TIPS

REPORT WEEK
SEPTEMBER 7–13, 2026

SOURCE CHECK
SEPTEMBER 2, 2026 • 8:00 A.M. ET

PURPOSE
PUBLIC-SOURCE MOVEMENT AWARENESS

EXECUTIVE MOVEMENT PRIORITY Plan added time for TPA Red Side departures and for event traffic near USF and Raymond James Stadium from September 11 through 13.

01 SITUATIONAL SNAPSHOT

- Highest planned venue concentration is September 11–13 near USF and Raymond James Stadium.
- TPA Red Departures drive is closed; Red Side drop-offs are redirected to Red Express Curbsides.
- No client-actionable public-safety item is entered in this pilot. Recheck official pages before release.

03 PORT & AIRPORT

- TPA Red Departures closure began Aug. 31 and is scheduled through mid-October.
- Red Side travelers should use Red Express Curbsides; curbside bag check remains available.
- Refresh Port Tampa Bay’s official schedule before publication. Add ship and terminal details only after verification.

05 PUBLIC SAFETY & CIVIL ACTIVITY

- Use official public releases and permitted-event notices only.
- Do not include named-person surveillance, private data, speculative threat labels, or unverified social-media claims.

07 EXECUTIVE TRAVEL TIP

- For a Red Side departure at TPA, confirm the airline before arrival, use Red Express Curbsides, and allow time for the indoor route to Ticketing.

02 MAJOR EVENTS & VENUES

- Fri., Sep. 11: Grupo Frontera, Yuengling Center, 8:00 p.m.
- Sat.–Sun., Sep. 12–13: Bruno Mars, Raymond James Stadium.
- Movement implication: protect arrival, staging, and recovery buffers around both venue zones.

04 ROADWAY & INFRASTRUCTURE

- Check FDOT Tampa Bay, FL511, and municipal closure maps on compile day and before active movement.
- Treat event congestion as a planning hypothesis unless an official closure or traffic plan is published.

06 WEATHER & SEASONAL RISK

- NWS Tampa Bay’s near-term outlook supports planning for afternoon and evening showers and thunderstorms.
- As of Sep. 2, NHC expected no Atlantic tropical cyclone formation during the next seven days.
- Refresh both sources immediately before sending. Later-week conditions are not yet reliable.

08 ECOLUXE CAPABILITY SPOTLIGHT

- EcoLuxe coordinates premium prearranged ground movement using documented scheduling, communication, and driver-assignment procedures.
- Publish certification, LEO staffing, fleet, security, availability, or partner claims only after evidence and owner approval.

PILOT CONTROL: Verify all dates, conditions, advisories, and capability claims at publication. Do not forward externally until approved.
Conditions may change. Confirm live routes, access, weather, and security requirements before movement.

PREPARED MOVEMENT STARTS BEFORE PICKUP.
